Period fo	The MAILING DATE of this communication ap or Reply	pears on the cover sheet with the d	correspondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Amendment filed on has been received.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-3, 9-11, 26-28, 34-36, 57 are rejected under 35 U.S.C. 102(b) as being anticipated by Patil et al (U. S. Patent no. 5070284).

Vehicle suspension with actuator 100, Clamp circuit comprises control 142 and resistors 138 and switches controlled by relay 140

4. Claims 1-3, 6,7, 9-13, 16-22, 25-28, 31,32, 34-46, 57,58 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller (U. S. Patent no. 5296785).

Vehicle suspension with actuator 100, Clamp circuit with coils 124, switches 162,166a, powered by battery 140 or capacitor 168, pulsed by pulser 182 See abstract.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 4,5,8, 14,15,23,24,29,30, 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller.

Miller is relied upon as above.

Regarding claims 4,5,14,15,23,24,29,30, Miller does not specifically disclose the use of solid state electronics. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use solid state electronics in the device of Miller as the use of solid state electronics has many well known advantages. They are cheaper to make, more reliable (no moving parts), in general lower power consumption, and are more resistant to vibrations that would be experience in a vehicle.

Regarding claims 8,33, Miller does not specifically disclose a Royer oscillator. Royer oscillators are well known and It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a Royer Oscillator as the selection of specific well known elements to perform a specific function is merely a design choice.

Response to Arguments

7. Applicant's arguments filed 8/2/06 have been fully considered but they are not persuasive. Applicants argue that neither Patil or Miller disclose a clamp circuit that is activated by movement of the actuator. The examiner disagrees. The clamp circuits provide no damping until the actuator moves. Therefore, the clamp circuit, whose function is to provide damping, is activated by the actuator movement. Arguments based on the specific structure in the specification are irrelevant since such structure is not in the claims.

Application/Control Number: 10/657,496 Page 4

Art Unit: 3683

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 3683

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 571-272-7124. The examiner can normally be reached on M-F 10 am-3 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan can be reached on 571 272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
